

# Healthcare hot spots

## These areas require hygienic solutions to help stop the spread of germs.

- Targeting “hot spots” with hand and surface hygiene is a key step toward helping reduce the spread of germs.
- Objects touched by lots of people throughout the day should be cleaned and disinfected frequently to help break the chain of germ transmission:

- Door handles
- Sink fixtures
- Bed and chair rails
- Over-bed table
- Elevator buttons
- Light switches
- Telephone
- TV remote
