Endless patient engagement opportunities

This innovative messaging platform can be used to comfort patients with peaceful imagery, encourage compliance with hand washing protocols or champion an important cause.

Comfort

Evidence suggests that the display of visual art, especially images of nature, can have positive effects on health outcomes, including shorter length of stay, increased pain tolerance and decreased anxiety.¹

Compliance

Signage reinforcing healthy hand washing practices can help enhance compliance, especially when signs remind healthcare professionals that they are keeping patients safe.²

Cause

Promoting a heartfelt campaign, story or mission can help unlock empathy and encourage pro-social behaviours like donating to a worthwhile cause.
